Uputstvo u slučaju opasnosti od požara

Aparati za gašenje početnih požara su raspoređeni širom zgrade na svim spratovima. Oznake i tekst na aparatu vam ukazuju na to za šta je aparat pogodan i kako se koristi.

Izlazi u slučaju opasnosti: Kada se smestite u hotelsku sobu treba da uradite sledeće:

- Proverite da li su svi prozori i vrata u ispravnom stanju; ako postoje nepravilnosti (kvarovi) prijavite ih recepciji.
- U slučaju požara pozovite recepciju na 9 ili vatrogasnu službu na (193). Nikada nemojte pretpostavljati da je neko to već učinio.
- Proverite poziciju Vaše sobe i stepeništa za slučaj evakuacije na evakuacionom planu, koji se nalazi pored ulaznih vrata sobe.
- Izađite u hodnik i proverite gde se nalaze najbliže požarne stepenice.

Opasnosti od dima: U slučaju požara dolazi do stvaranja dima i otrovnih gasova. Zapamtite da se dim uzdiže ka plafonu gde je i najgušći. Dim u Vašu hotelsku sobu može ući kroz ventilacione otvore, otvore oko ulaznih vrata ili kroz otvoren prozor.

Evakuacija: U slučaju požara, upozorite druge oko Vas i odmah napustite sobu na sledeći način:

- Uzmite dokumenta i novčanik i idite do ulaznih vrata sobe (ako je potrebno, puzite da biste izbegli da udahnete dim).
- Opipajte rukama ulazna vrata, uključujući i kvaku, da biste utvrdili da li osećate bilo kakvu toplotu. Ukoliko su vrata vruća na dodir, **NE OTVARAJTE IH**, jer to znači da je vatra u hodniku.

- Ako ne osetite toplotu, blago odškrinite vrata, držeći ruku na njima – da biste mogli da ih brzo zatvorite ukoliko je hodnik ispunjen dimom. Ako hodnik nije ispunjen dimom, izađite iz sobe zatvarajući vrata za sobom.
- Idite do najbližih požarnih stepenica, idući uza zid hodnika na čijoj je strani požarni izlaz, kako ne biste promašili izlaz u slučaju slabe vidljivosti zbog dima.
- Kada dođete do požarnog izlaza, siđite niz stepenice, držeći se čvrsto za ogradu – zato što Vas uspaničeni ljudi, koji takođe silaze niz stepenice, mogu oboriti u jurnjavi.

Napomena: Prilikom evakuacije NIKADA NE KORISTITE LIFT.

Ako ste zarobljeni u Vašoj sobi:

- Ukoliko su ulazna vrata Vaše sobe vruća na dodir, ili ako je hodnik ispunjen dimom, bezbednije je da ostanete u sobi i čekate pomoć vatrogasaca.
- U slučaju da je spoljašnji vazduh čist, otvorite prozor (nemojte razbijati staklo, da se ne biste povredili).
- Telefonirajte recepciji 9 da ih obavestite da ste zarobljeni u sobi.
- Namočite čaršave, prekrivače i peškire i podmetnite ih ispod ulaznih vrata i oko štokova – da biste tako sprečili da dim ulazi u sobu.
- Ako ulazna vrata postanu jako vruća na dodir, koristite bokal za vodu ili veću čašu pa njima vodom polivajte vrata.

NE ZABORAVITE DA JE PANIKA NAJVEĆI NEPRIJATELJ U SITUACIJAMA POŽARA, PA APELUJEMO DA URADITE KAKO JE NAVEDENO U OVOM UPUTSTVU I MIRNO SAČEKATE POMOĆ VATROGASACA.

GOSTILJSKI VODOPAD

Gostiljski vodopad je jedna od najatraktivnijih hidroloških vrednosti Zlatibora. Nalazi se u selu Gostilje na 25 km od centra Zlatibora. Na Gostiljskoj reci, ispred ušća u reku Katušnicu, voda se obrušava sa 22 m visoke krečnjačke litice, formirajući tako jedinstven vodopad, koji se ubraja među najviše prirodne vodopade u Srbiji. Nizvodno od vodopada potok gradi veći broj manjih vodopada i slapova sve do ušća u reku Katušnicu. Voda je hladna i stojeći u neposrednoj blizini vodopada može se osetiti efekat hladnog tuša, što je u toku vrelih letnjih dana pravo osveženje. Prostor oko vodopada je kompletno uređen za turističke posete.

Urađene su pešačke staze sa klupicama i dečije igralište. U neposrednoj blizini se nalazi fudbalski teren i uređeni bezen za kupanje, koji se puni izvorskom vodom. Za kompletan ugođaj na početku prilaznog puta do vodopada se nalazi restoran Gostiljska vrela, koji je uređen u etno stilu, a sa obe letnje terase može se uživati u krajoliku i zvucima prirode i obližnje reke. Na meniju restorana osim nacionalnih specijaliteta mogu se probati i pastrmka na žaru iz obližnjeg ribnjaka kalifornijske pastrmke. Za najmlađe je uređeno mini dečije igralište i mini zoo vrt.

Gostiljski vodopad je zlatiborska atrakcija koju vredi posetiti i uživati u jedinstvenim planinskim prizorima. Radno vreme u zimskom period je od 9 do 16.30 časova, a u letnjem periodu od 9 do 20 časova.

STOPIĆA PEĆINA

Stopića pećina se nalazi na severoistočnoj strani planine Zlatibor, između sela Rožanstvo i Trnava, na par stotina metara udaljenosti od puta Zlatibor-Sirogojno, što je čini jednom od najpristupačnijih speleoloških objekata Srbije. Udaljena je od turističkog centra Zlatibora 19 km. Za zlatiborsku pećinu imponantnih dimenzija stručna javnost zainteresovala se još početkom dvadesetog veka, a prve pisane podatke o njoj nalazimo u Zapisniku Srpskog geološkog društva iz 1901. godine, dok je prva speleološka istraživanja obavio naš veliki istraživač i tvorac naučne speleologije, čuveni Jovan Cvijić od 1909. do 1913. godine.

Stopića pećina dobila je naziv po zaseoku Stopići. Postojeća pešačka staza se spaja sa starom prilaznom stazom, kojom se nekada dolazilo do pećine. Najinteresantniji potez na staroj stazi je prolazak između vighedi. Vighedi su otvori u pećinskoj tavanici, a u narodu su poznati pod nazivom dugure. Ima ih ukupno šest i svaki otvor povezan je sa pećinom sistemom bočnih kanala. Vighedi su različite veličine, a najveći je dugačak 22,5 metara i širok 16 metara.

MOKRA GORA I DRVENGRAD

Mokra Gora je planinsko selo koje se prostire između planina Tare i Zlatibora, poznato po svojoj živopisnoj prirodi i Šarganskoj osmici, pruži uskog koloseka koja prolazi ovim predelom.

Ne propustite priliku da se provozate parnom lokomotivom koja se probija kroz stenovite tesnace i useke, trasom na kojoj pruga pravi neobičnu putanju u obliku broja osam, po čemu je i dobila svoj čuveni naziv.

Na putu za Taru, na obližnjem brdu Mećavnik, nalazi se Drvengrad, etno selo koje je sagradio reditelj Emir Kusturica.

Drvengrad je izgrađen u etno stilu i odiše jedinstvenom atmosferom, predstavlja poznatu turističku atrakciju i ima svoju crkvu, galeriju, bioskop, knjižaru, poslastičarnicu, nacionalni restoran i prodavnicu narodne radinosti tog kraja.

SIROGOJNO

Sirogojno je selo smešteno na istočnom obodu zlatiborske visoravni.

U njemu se nalazi muzej na otvorenom "Staro selo", koji je jedan od najznačajnijih turističkih objekata ovog kraja u kojem je prikazan život seoske porodice s kraja XIX i početka XX veka. Svi objekti i pokućstvo su autentični i preneti na muzejski prostor koji se prostire na površini od 4,5 ha.

Fire Emergency Procedure

Fire extinguishers are distributed all over the building and on each floor. On every fire extinguisher, labels and text will guide you through the procedure in case of fire.

Emergency exits: When accommodated in a hotel room, please follow the next steps:

- Make sure that all windows and doors are in good condition and report any irregularities to the reception desk.
- In case of fire please call the reception desk (9) or the fire department (193). Never assume that someone else did.
- Check your position and the position of the fire stairs on the evacuation plan, located next to the room entrance door.
- Get out into the hallway and check where the nearest fire stairs are located.

Danger of smoke: Fires cause smoke and toxic gases. Remember that smoke rises toward the ceiling where it is the densest. Smoke can enter into your room through the ventilation shafts, openings around the front door or through an open window.

Evacuation: In case of fire, immediately warn everyone around you and leave the room following the next procedure:

- Take your documents and wallet and proceed to the room entrance door (if necessary, crawl to avoid inhaling smoke).
- Feel the room entrance door, including the handle, to determine if you feel any heat. If the door is hot to the touch, DO NOT OPEN THEM, because it means that the fire is in the hallway.

- If you do not feel any heat, gently open the door, holding hands on them – so you can quickly shut them if the hallway is filled with smoke. If there is no smoke in the hallway, leave the room closing the door behind you.
- Proceed to the nearest fire stairs, using the side of the hallway where the exit is, avoiding to miss the exit in case of low visibility.
- When you get to the fire exit, take the stairs down, holding the railing – because other people in panic, can knock you down hurrying.

Note: During the evacuation NEVER USE THE ELEVATOR.

If you are trapped in your room:

- In case your room entrance door is hot to the touch or the hallway is filled up with smoke, it is safer to stay in the room and wait for the firefighters.
- If the outdoor air is clean, open the window (do not break the glass, you can hurt yourself).
- Phone the reception desk (9) and inform them that you are trapped in your room.
- Soak linen, covers and towels and place them under and around the room entrance door to prevent smoke coming into the room.
- If the room entrance door becomes very hot to the touch, use a jug or a bigger glass to pour water with it over the door.

DO NOT FORGET THAT PANIC IS THE BIGGEST ENEMY IN FIRE HAZARD SITUATIONS, SO WE APPEAL TO FOLLOW THE ABOVE INSTRUCTIONS, AND CALMLY WAIT FOR THE ASSISTANCE OF THE FIRE DEPARTMENT.

STOPIĆA CAVE

Stopića cave is a river cave with the Trnavski stream flowing through it. It consists of three speleological and hydrologic horizons: the periodically flooded horizon, the river horizon and the youngest horizon the crack. Without its youngest system Stopića cave is 1,691.5m long, it covers the area of 7,911.5m² and its volume is over 120,000m³.

The cave got its name after the settlement Stopići that belongs to the village Rožanstvo. The first written data about the cave were given by Radoslav Vasović in 1901 in the Serbian Geologists' Association report and the first speleological researches were done by our great research worker and father of our scientific speleology Jovan Cvijić in the years 1909 and 1913.

MOKRA GORA (WET MOUNTAIN) I DRVENGRAD (TIMBER TOWN)

Mokra Gora is a mountain ethno village located between the Tara and Zlatibor mountains, famous for its natural sights and the Šargan eight, the old-school narrow track railway traversing the area in the shape of the number eight, which gave it its name.

Do not miss the chance to take a ride on the steam locomotive as it makes its way through the picturesque rocky passes.

On the way to Mount Tara, on the nearby Mećavnik hill, lies Drvengrad, the ethno village filmmaker Emir Kusturica constructed.

A village made of wood, as its name suggests, it was built in the ancient style and has a timeless aura about it. A well-known tourist destination already, Drvengrad is complete with church, art gallery, cinema, bookstore, pastry shop, national restaurant, and a folk handicrafts store.

SIROGOJNO

Sirogojno is a village ensconced on the eastern edge of the Zlatibor plateau.

It is home to the open-air museum "Staro selo", which is one of the most important cultural attractions in the area, and in which the life of a turn-of-the-century peasant family is fleshed out. All buildings and furnishings on site are authentic. The museum covers an area of 45,000m².

ANDRIĆGRAD

Andrićgrad is a tourist, cultural, administrative, and educational complex erected in nearby Višegrad, in the Republic of Srpska.

It was born from an idea conceived by the filmmaker Emir Kusturica, inspired by the works of the Nobel-prize winner Ivo Andrić, with the purpose of building bridges between the war-torn factions living in the area, promoting tourism, culture, peace, equality, literacy, bringing together people, regions, and the world. A walk through the streets of Andrićgrad will have you travelling through time. The town is rich in amenities such as a theatre, cinema, city hall, the building of the high school Ivo Andrić attended, river port, church, squares, old town, shops, and the Ivo Andrić memorial home.
